OUR SERVICES.

Residential Roofing

We specialise in custom Colorbond® roofing and cladding solutions, crafted to enhance the beauty and performance of luxury homes.

Commercial Roofing and Cladding

We provide tailored commercial roofing and cladding solutions designed for durability, energy efficiency, and aesthetic appeal, meeting the unique needs of property owners, developers, and architects.

Industrial Roofing and Cladding

We specialise in durable, cost-effective industrial roofing and cladding for warehouses, plants, and agricultural buildings, designed for long-term performance.

Roof Replacements

We are experts in roof replacements, offering expert solutions to upgrade deteriorating roofing systems and enhance the longevity and performance of your property.

Tile-to-Metal Conversions

We transform tile roofs into modern, durable Colorbond® metal roofing, improving aesthetic appeal, durability, energy efficiency, and reducing maintenance, while ensuring a seamless conversion process.

Pergolas and Verandahs

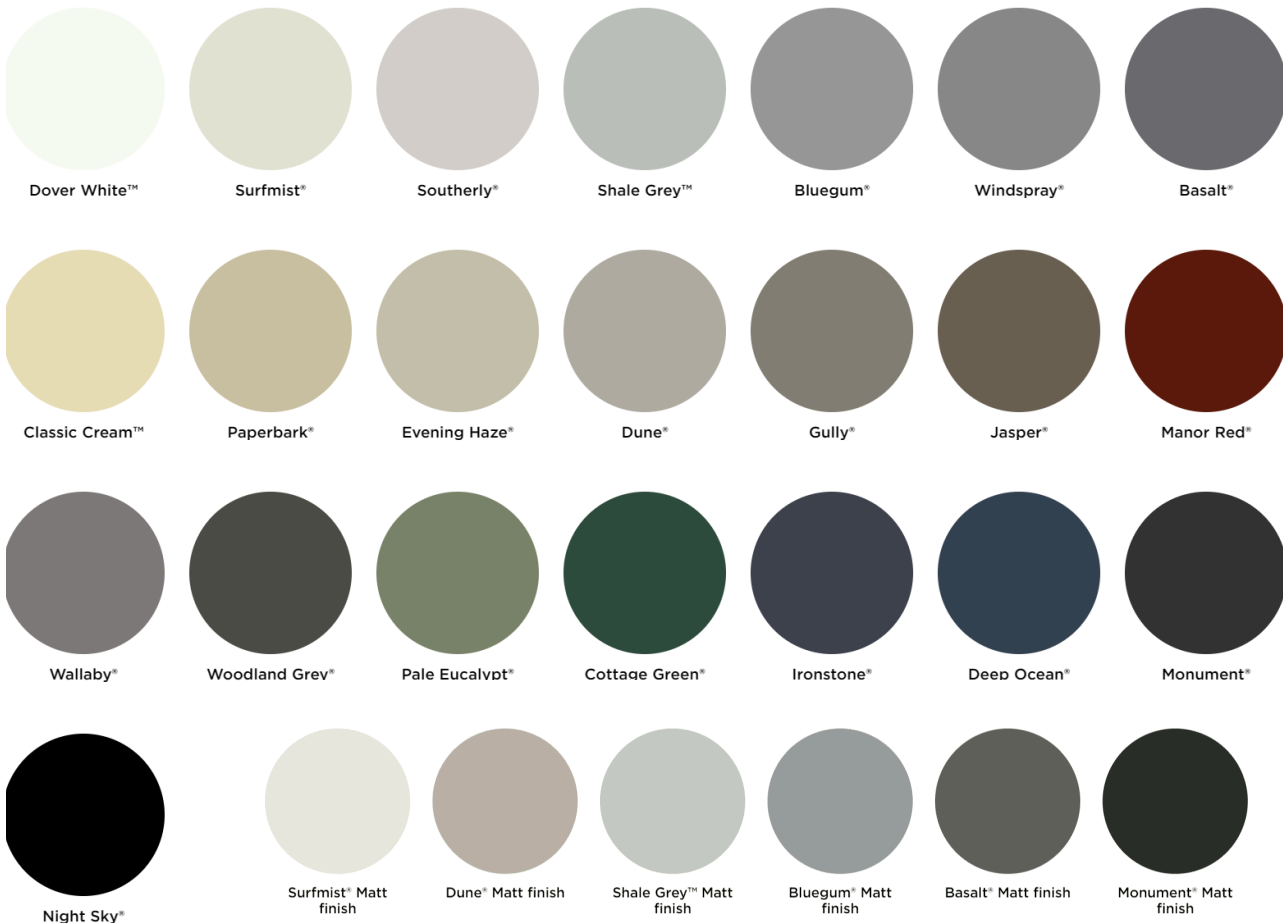

We have experience in repairing and replacing pergolas and verandahs, offering expert solutions to enhance outdoor living spaces with durable, custom-built structures that complement your property's design.

RANGE, MENZEL BUILDING
CO. OFFERS THE FULL 22
CORE COLOUR RANGE
ALONGSIDE THE OPTION
OF MATT AND ULTRA
FINISHES.

ZINCALUME

Roof sheeting made of ZINCALUME® steel is an iconic Australian building product that has repeatedly proven its worth as a strong, durable, and cost-effective material. It is suitable for a wide range of building designs and various commercial and industrial applications.

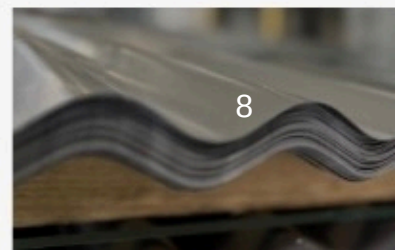

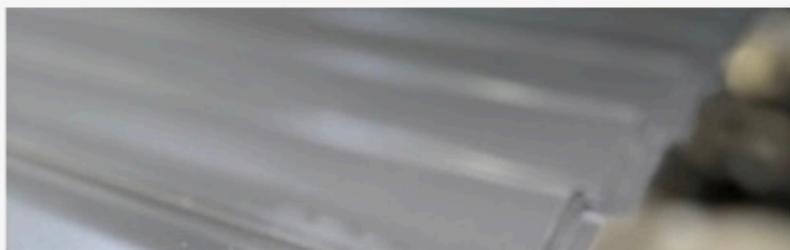

PERMALITE ALUMINIMUM

Choosing the best roofing material for any project should consider the full lifecycle of that material – this is where PERMALITE® aluminium roofing excels, thanks to its ability to remain corrosion free in the most aggressive of environments, with minimal maintenance to boot.

SHALLOW CORRUGATED 16MM

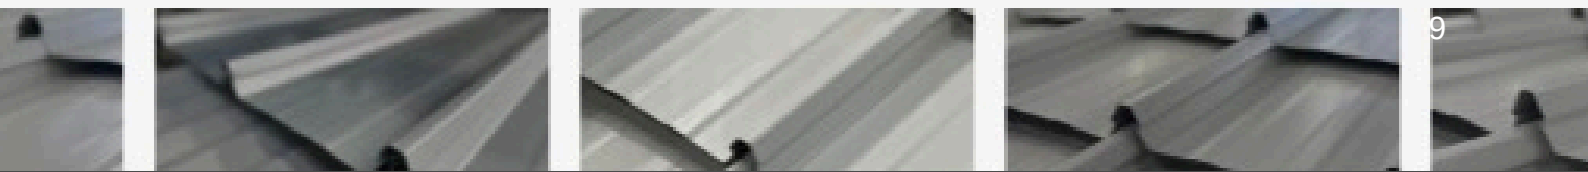

Revolution by Design's Shallow Corrugated 16mm steel roofing sheets are designed to provide a seamless finish for both roofing and walling applications. With a high-quality seamless finish and 762mm coverage, it is the ideal solution for a durable and long-lasting application.

KLIPIKOK 700

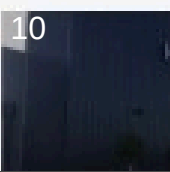

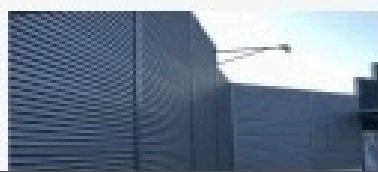

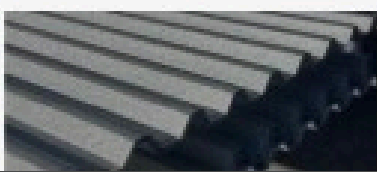

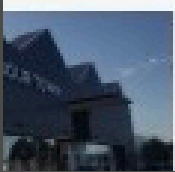

Introducing the innovative Kliplok 700 profile – the perfect solution for your roofing and walling needs. With squared shoulders and a concealed fix, this profile offers more clipping clearance and a new strong clip, ensuring a distinct and classically smooth finish. Kliplok is rolled by operators who have over 18 years of 700 steel deck experience, so you can trust that your project is in good hands.

SPANDECK

RevSpan 700 is an innovative product boasting improved lapping and capillary action, making it the perfect choice for cladding applications. Designed with a higher, squarer multi-rib design, providing superior strength and greater spanning qualities. It is available in both roofing and walling applications, making it a versatile choice for both domestic and industrial applications.

TRUE OAK DEEP 21

With a 760mm x 21mm corrugated profile, True Oak Deep 21 is suitable for any roofing, walling and cladding applications. True Oak Deep 21 was based on the original 19th Century Walkers 'Gospal Oak' profile, now with a modern approach allowing for a rounder, fuller and deeper profile.

For a complete roofing solution, be sure to use True Oak Barge and Ridge in conjunction with our corrugated roofing. Choose True Oak for a timeless and sturdy roofing option. Additionally, add on the option of the Z600 Heritage Galvanised 8 flute cover.

TRUE OAK SUPER 5

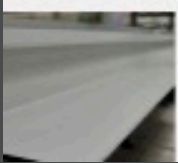

Introducing the True Oak Super 5 – a 35mm corrugated profile is the perfect blend of corrugated classic design and modern technology, ideal for roofing and walling applications, making it a versatile choice for any project. This roofing series is a tribute to the original 19th century Walkers ‘Gospel Oak’ profile, featuring a rounder, fuller, deeper, and more shapely profile.

CUSTOM FLASHINGS

At Menzel Building Co., ordering flashings has never been easier! RBD's expert team can fold flashings custom to your specific requirements.

We understand no two projects are the same, that's why all flashings are custom made to your specific requirements. Available in COLORBOND® Standard and Ultra Steel, plus Zinc/Alum options, our expert team can fold flashings in a flash!

TL-5 (SUPADECK)

Rev 5 Plus is a highly durable roofing and walling profile that is designed to withstand the toughest of weather conditions. The profile features a trapezoidal profile, it is an ideal choice for commercial and industrial applications due to its exceptional strength and robustness.

CURVING

At Menzel Building Co. we offer a range of profiles; Bullnose, Concave and Convex, which can be expertly curved using our specifically designed precision curving machines. We can curve traditional or custom curving, ensuring tight curves and precision are met. Our skilled craftsmen are dedicated to delivering a high-quality outcome with accuracy and seamlessness.

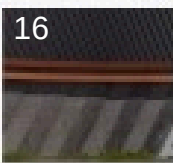

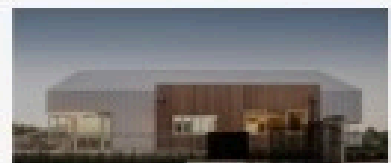

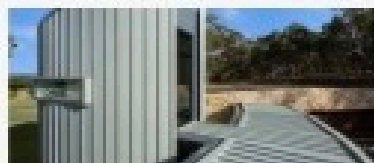

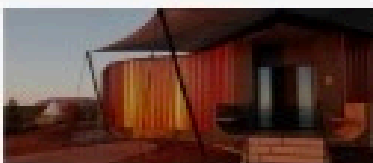

We offer a full range of curved options in True Oak range, along with finishes such as Zinc/Alum Steel, COLORBOND® Steel, and Heritage Galvanised Z600. Explore our range of profiles and colour options to elevate your residential or commercial project with creative freedom. Refer to our Curving Order Form for further specifications.

MAXLINE

Maxline is a premium roofing and cladding material that can enhance the aesthetics of large buildings such as offices, malls, and government buildings.

It is named after the famous South Australian architect, Max Pritchard, who has used it extensively in many award-winning homes.

EUROPLUS RANGE

The EuroPlus Range offers a diverse selection of concealed fixed wall cladding options, designed to elevate the appearance, endurance, and weather resistance of both residential and commercial projects. Featuring a range of profiles, each with its unique functional properties, EuroPlus is the ideal cladding choice for numerous applications. Whether you are looking for a sophisticated yet robust aesthetic or a weather-resistant solution for your project, the EuroPlus Range has got you covered.

115 QUAD GUTTER

115 Quad is a highly versatile and adaptable style of guttering that is suitable for various types of homes, including older-style colonial homes as well as contemporary homes.

It can also be used extensively in new home construction. The 115 Quad Gutter can be customised to suit any project, making it an ideal choice for fast and easy installation.

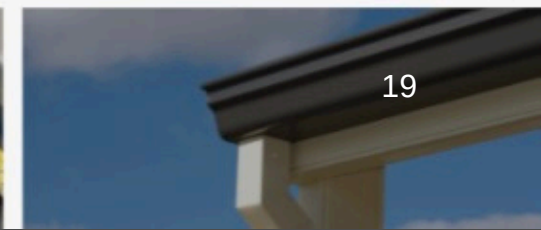

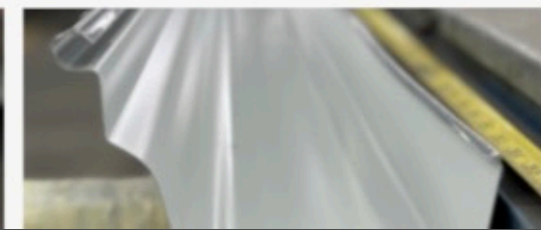

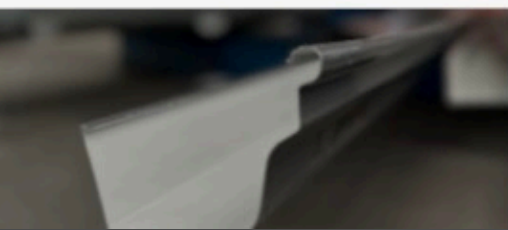

115 OG GUTTER

The modern take on a timeless classic. 115 OG is a low-cost, lightweight, and robust alternative to the popular full-size OG profile.

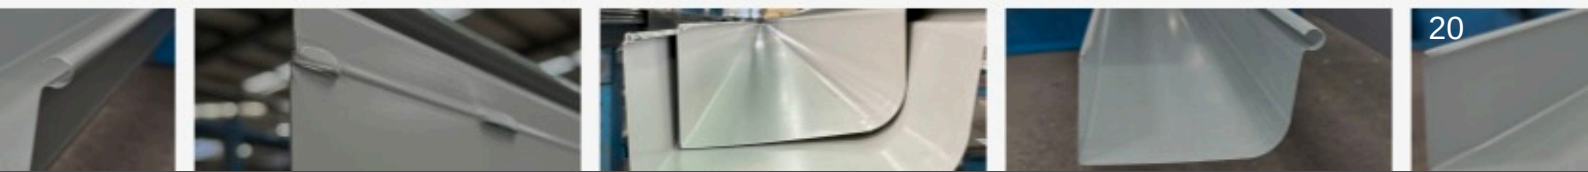

This profile is especially popular in the new home and country markets for its traditional shape that has a modern hi-tensile finish.

125 D GUTTER

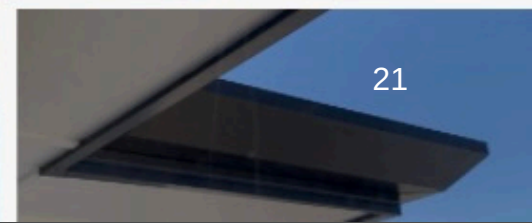

The 125 D Gutter is a traditional, premium-quality product that is highly sought after within the market. This gutter profile is designed to provide a soft feed and a high water carrying capacity, making it thicker and more durable than other gutter options. With its distinctive D profile, the 125D is made from soft feed, available for re-guttering and new homes.

MOSMAN/ SHORLINE GUTTER

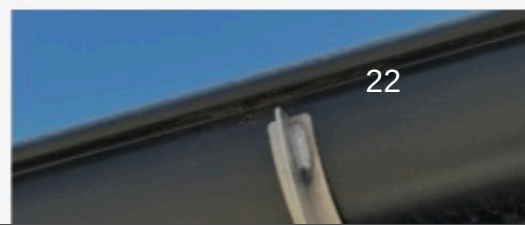

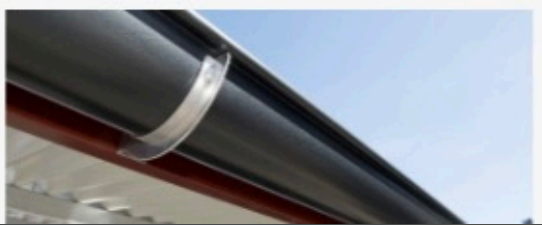

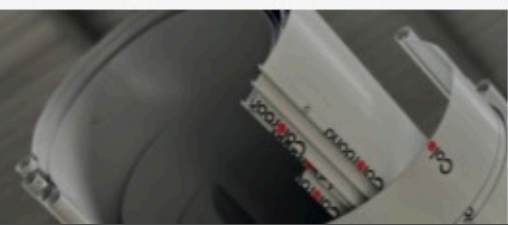

The Mosman Gutter has swiftly become an industry favourite, thanks to its sleek and modern finish. The gutter system features a large water carrying capacity, making it perfect for households that experience heavy rainfall.

REVBIG GUTTER

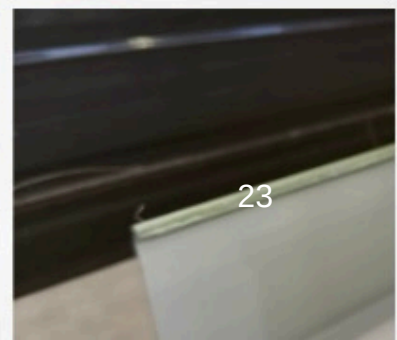

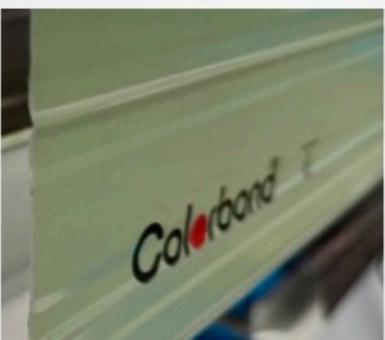

Our RevBig range of gutters offers solutions never seen before. With variable width and diameter options and available in longer continuous lengths, the RevBig Gutter is not only easy to install but carries more water off your roof. The RevBig has the largest water carrying capacity in South Australia, making it the finest choice for commercial buildings, especially schools.

FASCIA GUTTER

The simple yet traditional Fascia Gutter is a reliable and popular choice suitable for all styles of housing and small commercial projects. The Fascia Gutter is a versatile, reliable and customisable gutter with its high front is also ideal for concealing sheet ends, enhancing the aesthetic appeal of your roofing system.

VICTORY ROOFING DOUBLE SIDED COLOUR RANGE

The Victory Home Improvements Range is available in various colourway options, with the addition of gloss on the underside of the sheet. Match your Victory Product with Gloss Beams or a Zinc/Alum finish. Victory Roofing is available in V Dek, RevCool & True Oak Profiles* with various spans and pitch options.

VICTORY CARPORTS

Victory Carport's are designed to fit perfectly into your area. With options for your carport to be attached or freestanding ensuring you can choose the best carport for your area. To match your home's style, Victory Carports come in a range of profiles and colourways, increasing value for your space.

BONDOR ISULATED ROOF PANELS

Bondor Insulated Panel assists you in maintaining the perfect climate for your outdoor space, regardless of the weather. Crafted from roofing and ceiling layers bonded to insulated polystyrene, Bondor has a sleek and sophisticated design, perfect to compliment your outdoor space.

VICTORY VERANDAHS

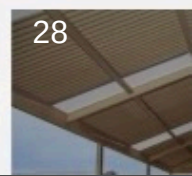

Victory Verandahs are designed with durability and flexibility in mind to suit your home and lifestyle needs. Increase entertaining options with an attached or freestanding Victory Verandah to complement your existing structures. Victory's stunning range of Verandah options are the perfect way to add value and appeal to your outdoor living space.

VICTORY PATIOS AND PERGOLAS

Enjoy the outdoors all year round with a Victory Pergola or Patio. With options for freestanding or attached, Victory Pergola & Patios are the perfect option to complement your already existing space. Take your outdoor space to the next level by selecting from our various profile options and colourways, designed with durability and flexibility in mind.

V-DEK

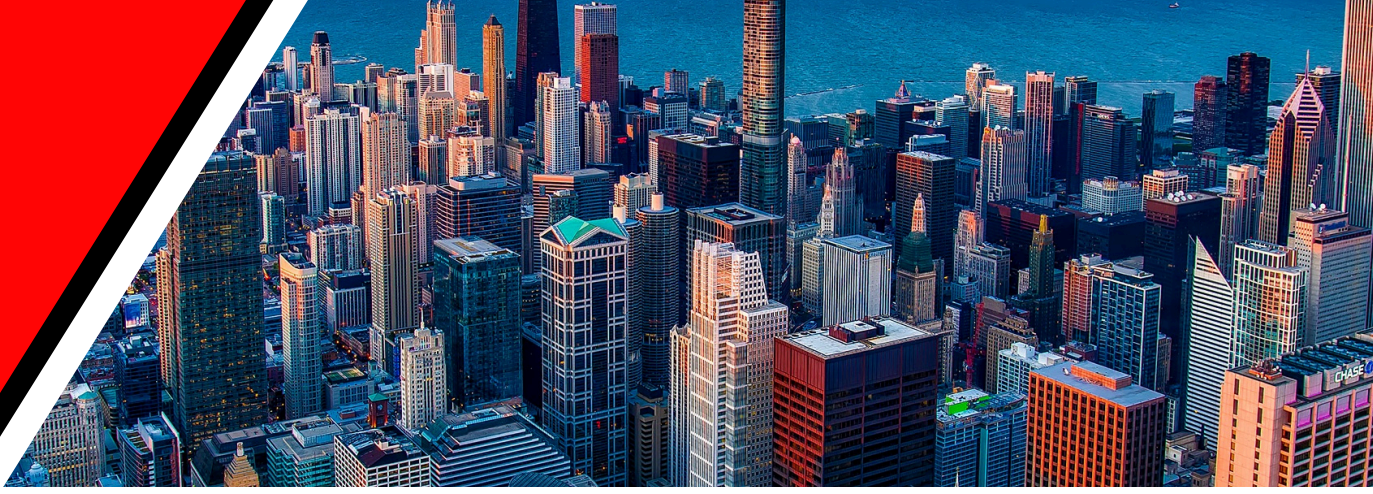

introducing the Revolution V Dek – a versatile product traditionally used as a free spanning verandah deck. The pan fixed profile is also ideal for commercial applications as a decorative panel. Manufactured in double sided or single sided full COLORBOND® Standard Steel, V-Dek offers spanning capabilities of up to 4500mm, making it the product of choice to enhance your structure.

Note: V-Dek is designed for non-trafficable verandah applications only

POLYPIU

Originating from Italy, PolyPiu introduces a new frontier in polycarbonate sheeting. With a range of profiles, thicknesses, and colours available, PolyPiu guarantees remarkable impact resistance, impressive thermal ratings, and UV protection tailored for the Australian climate. Adaptable and pioneering, PolyPiu seamlessly integrates into Victory additions or stands independently for creative applications. Available at Revolution by Design, PolyPiu is available in SmartPIU, ReversPIU, CarboPIU and PanelPIU.

SELECT THE PERFECT POLYCARBONATE COLOUR WITH POLYPIU®.

WITH HIGH UV PROTECTION, ALONG WITH EXCELLENT LIGHT AND HEAT TRANSMISSION MAKES POLYPIU® THE PERFECT OPTION FOR ANY POLYCARBONATE APPLICATION.

ABOUT US.

Menzel Building Co. is a family-owned business founded by brothers Tim and Sam Menzel in 2024, with a mission to redefine the building industry through integrity, trust, and exceptional craftsmanship. With expertise in high-end cladding and Colorbond® roofing, we create durable, functional, and visually striking solutions for residential, commercial, and industrial projects, ensuring long-lasting value for our clients.

Prioritising people over profits, we've built a close-knit, in-house team dedicated to delivering exceptional results while fostering a collaborative and respectful environment. At Menzel Building Co., we restore the human touch to construction, offering efficient, transparent, and personalised service that exceeds expectations. Whether enhancing a corporate exterior or transforming a family home, we treat every project as a labour of love, building not just structures, but lasting relationships.
